SUMMARY

GTM and analytics professional with 2+ years across presales and client-facing delivery, scoping engagements, qualifying opportunities, and translating technical into business outcomes for senior stakeholders. Combines a sales-engineering instinct with a strong analytics foundation (SQL, Python, dashboards) and an AI-native way of working. Thrives in fast-paced environments where the goal is to turn ambiguous client needs into clear value.

SPECIALIZED SKILLS

- **GTM & Solutions:** Presales & Discovery, Requirements Scoping, Opportunity Qualification, Solution Design, Technical Demos, Proposal Development, Stakeholder Management
- **Client & Delivery:** Client-Facing Delivery, Implementation, Success Metrics & Outcome Ownership, Cross-functional Coordination
- **Analytics & Technical:** SQL, Python (Pandas, NumPy), Tableau, Power BI, Dashboarding, Data-Driven Insights, A/B Testing
- **AI-Native:** AI-Assisted Workflows (ChatGPT, Claude), Prompting, AI Tools for Outreach & Analysis
- **Tools & Ways of Working:** CRM, Agile/Jira, Confluence, Cross-functional Partnership, Fast Execution Under Ambiguity

EXPERIENCE

Research Assistant, University of California, San Diego, CA 05/2025 - Present

- Built automated data-quality and monitoring workflows for 30,000+ records using SQL and Python, applying validation and anomaly logic to ensure reliable, decision-ready data.
- Developed a pre/post evaluation framework to quantify behavioral and policy shifts, delivering root-cause findings and executive-ready summaries to inform decisions.

Business Consultant, Thermo Fisher, University of California, San Diego, CA 04/2025 - 06/2025

- Partnered with client stakeholders to frame ambiguous, open-ended business problems into measurable KPIs and a clear analytical approach, presenting findings that guided operational decisions.
- Built self-serve Tableau dashboards and translated insights into prioritized recommendations for both technical and non-technical audiences across the engagement.

Business Analyst - Delivery, Quantiphi Analytics, Bangalore, India 11/2022 - 08/2023

- Owned the client-facing delivery of an AI recommendation solution end to end, aligning on success criteria early and managing the relationship from kickoff through deployment on AWS.
- Led cross-functional execution across Product, Engineering, and the client, translating between technical teams and business stakeholders to keep scope, timelines, and outcomes aligned under shifting priorities.
- Delivered the solution at 82% accuracy and drove adoption through stakeholder-ready readouts, a clear rollout plan, and ongoing performance monitoring to sustain results.

Business Analyst - Presales, Quantiphi Analytics, Bangalore, India 07/2021 - 11/2022

- Ran discovery on inbound and outbound leads for custom AI and analytics solutions, qualifying technical requirements, and converting prospects into \$100K–\$250K opportunities across Finance, Operations, and Supply Chain use cases.
- Scoped engagements with senior stakeholders, translating ambiguous business needs into clear requirements, success criteria, and tailored proposals that mapped technical capability to measurable outcomes.
- Partnered with Engineering to shape solution design and assess feasibility, building pitches and demos that connected the product to business value and accelerated conversion to a qualified pipeline.

PROJECTS

Intuit Next-Best-Offer Targeting | Python

- Built propensity models and SQL/Python pipelines across 75,000 customers to forecast response and generate prioritized targeting recommendations for outreach.
- Designed and analyzed A/B tests to validate lift and optimize targeting thresholds, tying every decision directly to expected business value rather than model accuracy alone.
- Translated results into a repeatable, metric-driven strategy that drove \$380K in incremental profit.

Pentathlon Email Personalization | Python

- Built a customer-level message-optimization model on 600,000 observations, recommending the best outreach message per customer from predicted purchase likelihood and order value.
- Converted predictions into expected profit and produced scalable, segment-level targeting outputs ready for go-to-market execution.
- Estimated personalization lift at scale (5M messages): ~€468K (+16.78%) over random assignment and ~€186K (+6.05%) over a single best-message approach.

EDUCATION

University of California, San Diego, CA, Master of Science in Business Analytics (GPA: 3.8) 12/2025

- **Relevant Courses:** Python, Data Engineering (if that ETL course counts), Business Intelligence Systems, Big Data

Manipal Institute of Technology, Manipal, India, B.Tech in Mechanical Engineering (GPA: 3.62) 08/2021
