

RISHIKUMAR MATHIAZHAGAN

www.linkedin.com/in/rishimathi | (858) 241-1288 | rishimathi@gmail.com

Analytical Data Professional with 3+ years of experience and an MS in Business Analytics, specializing in actionable analytics, A/B testing, and KPI optimization to drive paid user acquisition and growth.

SPECIALIZED SKILLS

- **Programming & Big Data:** Python (Pandas, NumPy, Scikit-Learn), SQL (Joins, CTEs, Window Functions, Optimization), R.
- **Operations & AI:** AI-Enabled Automations, Gen AI Agents, Workflow Streamlining, Automated QA & Monitoring.
- **Data Engineering:** ETL Pipelines, Data Quality Management, Data Modeling, Data Integration, Automated Integrity Monitoring.
- **BI & Analytics:** Tableau, Power BI, Excel (Financial/Sensitivity Modeling), A/B Testing, Statistical Analysis.
- **Cloud & Collaboration:** AWS (S3, EC2), Databricks, Agile/Jira, Git/GitHub.

EXPERIENCE

Research Assistant, University of California, San Diego, CA 05/2025 - Present

- **Automated Ops Workflows:** Built and deployed automated data-quality monitoring for 30,000+ records using Python validation checks and anomaly logic to surface inconsistencies in real-time.
- **Standardized Systems:** Utilized SQL and Python to standardize definitions and controls, reducing downstream reporting risk and automating recurring exception reporting to eliminate manual QA bottlenecks.

Business Consultant, Thermo Fisher, University of California, San Diego, CA 04/2025 - 06/2025

- **Built Internal Tools:** Created self-serve **Tableau** dashboards and drill-down scorecards, merging ~14,000 records using **SQL** and **Python** (Pandas, NumPy) to remove reporting bottlenecks for cross-functional partners.
- **Operational Deep Dives:** Conducted feature engineering and statistical analysis to isolate friction points in order-fulfillment, translating findings into prioritized operational changes.

Business Analyst - Delivery, Quantiphi Analytics, Bangalore, India 11/2022 - 08/2023

- **Implemented Automations:** Led the cross-functional delivery of an automated recommendation workflow, managing the full lifecycle from concept to AWS-hosted deployment (Amazon S3, EC2).
- **Stakeholder Collaboration:** Partnered with Product and Engineering to define success metrics, ensuring Spark and SQL-driven analytics aligned with business outcomes.

Business Analyst - Presales, Quantiphi Analytics, Bangalore, India 07/2021 - 11/2022

- **GTM Strategy & Scoping:** Led Go-To-Market strategy and design for custom AI solutions, including account segmentation and territory alignment while translating client discovery into scoped analytical approaches for \$100K–\$250K proposals.
- **Growth Analytics & Storytelling:** Synthesized pipeline and whitespace data to identify growth opportunities, building executive-ready presentations to support strategic planning cycles and QBRs.
- **Operational Design & Readiness:** Performed initial EDA in SQL to assess data readiness for large-scale automation projects and collaborated with engineers to define data flows and automated QA checks to successfully remove operational friction.

PROJECTS

Intuit QuickBooks Propensity Modeling | Python

- Built regression-based propensity models and automated Python pipelines to forecast upgrade likelihood across 75,000 small business customers; identified behavioral drivers and created a reusable KPI monitoring approach.
- Designed and analyzed A/B tests and conversion funnels to optimize user acquisition campaigns, informing targeting thresholds and improving ROAS to drive \$380K in incremental profit.
- Benchmarked a neural-network model to capture non-linear signals and incorporated the strongest insights into an interpretable solution to improve targeting quality and stakeholder trust.

Credit Card Financial Dashboard | SQL(PostgreSQL), Power BI, DAX

- Developed an interactive Power BI dashboard integrated with PostgreSQL to visualize \$55M in revenue and \$45M in transaction volume, optimizing risk monitoring by quantifying critical KPIs such as delinquency (6.06%) and card activation rates (57%).
- Engineered complex DAX measures to track Week-over-Week (WoW) performance, identifying a 28.8% revenue growth spike and a 93% transaction contribution from specific card segments (Blue & Silver).

Customer Churn Prediction | Python

- Built and compared churn models (Logistic Regression, Decision Trees, Neural Networks) on 39,000 customers, calibrating to a 2% base churn rate and selecting the best-performing approach based on holdout performance.
- Identified the top churn drivers via permutation importance and translated results into retention triggers and monitoring KPIs, then quantified impact with a 60-month CLV model prioritizing cohorts up to 4.17% churn vs. a 2% baseline.

EDUCATION

University of California, San Diego, CA, Master of Science in Business Analytics (GPA: 3.8) 12/2025

- **Relevant Courses:** SQL, Fraud Analytics, Python, Business Analytics, Business Intelligence Systems, Customer Analytics, Marketing Analytics

Manipal Institute of Technology, Manipal, India, B.Tech in Mechanical Engineering (GPA: 3.62) 08/2021

- **Relevant Courses:** Supply Chain & Logistics Management, Operations Management, Financial Management, C++
